(iii)

(b)

1 x3=3

(i) <u>It hand and Propanal</u>: It hand gives yellow ppt of Iodofor  $n(CH_3)$  on addition of NaOH/ $I_2$  whereas Propanal does not give this test.

( or any other suitable test)

(ii) <u>Benzoic acid and Phenol</u>: Add neutral  $FeQ_3$  to both, phenol gives purple/violet colouration whereas Benzoic acid does not give this test or/Add NaHCO3 to both, Benzoic acid will give brisk effervescence whereas phenol does not give this test.

1+1
